

Baby's development up to 12 months:

These are just guidelines and not all babies develop the same way. They are unique and work at their own pace.

The first few days with baby are just getting used to each other.

Within the first few weeks baby will notice your face, voice and touch.

3 months:

- Baby begins to smile
- Baby enjoys playtime
- Baby can recognise you from across the room

4 - 7 months:

- Baby is now able to see in colour

8 - 12 months:

- Baby's babble will become clearer and baby will start to say their first words
